TECHNICAL SKILLS

Languages

JavaScript, C++, Python

Frontend

HTML, CSS, React, Tailwind CSS

Backend

Node.js, Express.js, REST APIs

Database

MongoDB

TOOLS

Git, GitHub, Postman, VS Code

LEARNING & INTERESTS

- MERN Stack Development
- Data Structures & Algorithms
- Building real-world apps
- Modern web technologies

PROFESSIONAL SUMMARY

Results-driven Software Engineering student with a strong foundation in full-stack web development and object-oriented programming. Proficient in the MERN stack and C++, with demonstrated experience building optimized, scalable web applications and developing robust RESTful APIs. Adept at algorithm design and modern web implementation, seeking a software engineering internship to contribute to impactful technical solutions within a fast-paced engineering team.

PROJECTS

Fleet Management System

View Repository

- **System Architecture:** Designed and built a full-stack fleet management web application to monitor, track, and streamline vehicle operations.
- **Backend Engineering:** Architected performant and scalable backend services using **Node.js** and **Express.js**.
- **API Development:** Implemented robust and secure **REST APIs** for efficient data integration and seamless client-server communication.
- **Database Design:** Engineered the data layer leveraging **MongoDB** for reliable storage, flexible schema design, and optimized data retrieval.

EDUCATION

B.E. in Computer Science

Expected: 2029

Swaminarayan University, Ahmedabad
